Choices, Choices, Choices

Arianna has been saving her chore money all summer. Her mother has allowed her to spend the money on school supplies of Arianna’s choosing. Here are some of her favorite items and the price for each:

- Lunchbox $2.50
- Art Supplies $0.75
- Pencil Box $1.25
- Mechanical Pencil 45¢

Arianna has **four dollars and twenty-five cents** to spend.

1. a. Select two items she might choose to purchase:

   ___________________________ and ___________________________

   b. What is the total cost of these two items? _____________

   **Show your work below.**

2. a. Select three items she might choose to purchase:

   ___________________________,
   ___________________________,
   ___________________________

   b. What is the total cost of these three items? _____________

   **Show your work below.**
c. How much money will Arianna have left over if she buys these three items? ______

Show your work below.

3. How many pencil boxes can Arianna buy without going over the $4.25 she has saved?

_______________

Show your calculations below.

Explain your thinking for #3 in words.
